

Please forward to your
Administrator and
Director of Nursing

AccuMed GUARANTEES our software will be compliant with MDS 3.0

Every product we offer, with the exception of Accu-Care DOS, will be fully compliant with MDS 3.0. For those still using Accu-Care DOS we are offering an extremely attractive upgrade option to our industry-leading Windows or web-based products.

For the last 18 months, AccuMed nurses, clinicians, designers, software engineers and quality assurance technicians have been preparing Accu-Care Clinical (Windows), Add-On, Orcas, Cypress and Pro-Tracking for MDS 3.0. When October 1st rolls around, your staff will have the tools they need to manage the new MDS 3.0 assessment process.

If you need any information about AccuMed or any of our technology solutions, please ask us by calling 800-777-9144. We would be happy to provide you with accurate, up-to-date information about our company and our products.

The industry is buzzing with information, *and misinformation*, about the MDS 3.0. Competitors' sales representatives, industry consultants and conference speakers are simply not a good source of information about our products or our company.

Did you know?

- AccuMed serves more than 4,000 facilities in all 50 states
- AccuMed has been a pioneer in providing a bi-directional electronic HL7 interface for Senior Care. We currently have more facilities communicating electronically with other health care providers' systems than any of our competitors.
- AccuMed has been in business for 27 years, and is owned by a Fortune 500 company.
- AccuMed is focused exclusively on Senior Care and we look forward to serving you for many more years.

Thank You for your continued support. Our entire organization is dedicated to providing you with the technology solutions you need to be successful.

Sincerely,

President
