

Introducing another industry-leading innovation from Omnicare:

ViCURA™

more than just an eMAR

more quality control

more decision support

more time for patient care

New from Omnicare

VICURA™

MUCH MORE THAN JUST AN eMAR.

- Web-based Software Solution
- Multidisciplinary Order Entry
- Integrated eMAR/eTAR
- Automated Medication Inventory Management
- Quality Management

more value for the administrator

- ✓ **Reduce overtime** by eliminating wasted time, the monthly MAR/TAR changeover and automating the medication inventory process
- ✓ **Reduce non-formulary medication costs** by alerting the user to non-formulary medication orders before they are placed
- ✓ **Improve quality and reduce risk** by standardizing best practices, ensuring that ordered tasks are completed and improving resident safety
- ✓ **Stand out** to referring hospitals, potential residents and staff by reducing deficiencies, driving better survey scores and improving the work environment

more value for the clinical leadership and staff

- ✓ **Eliminate the need to maintain the paper MAR/TAR** and reduce the risk of transcription errors
- ✓ **Eliminate the MAR/TAR changeover process** allowing nurses to spend their time doing more valuable and satisfying tasks
- ✓ **Eliminate the need to “chase meds” and fax orders** with automatic medication ordering and re-ordering from your Omnicare pharmacy
- ✓ **Simplify your staff’s job** with 2-click common orders and multidisciplinary order sets
- ✓ **Improve the care management process** by providing clear, easy to follow task lists and alerts
- ✓ **Ensure the 5 Rights of medication administration;** right med, right dose, right time, right route and the right resident
- ✓ **Standardize clinical best practices** within a facility or across your enterprise by defining and standardizing care processes in Vicura
